E. AWARDS

Recipient **National Citizen Award** 1995-96, as **Technocrat of the year**, presented by the *Hon'ble Prime Minister of India*.

During 1965 to 1978, I and my Team, at Tata–SSL, had developed many products, which were being imported. Some of the important products which we had developed with our own R&D, on a commercial scale were: 1. Cycle and Motor Cycle spoke wire, 2. Heald, Reed, Ring Traveler, Card Clothing wires, used in the Textile Industry, 3. 3-strand & 7-strand Pre-stressed wire used in Civil Engineering Construction, 4. Stainless steel wires used for welding and cables, 5. Detonator wire used in Explosives & Mining and 6. Low alloy wires for the manufacture of cold forged parts, Bolts & Nuts, and Bearing wire for the Ball Bearing Industry. 7. Developed processes for high-speed galvanizing of fine steel wires, used in wire cloth & wire netting, 8. Development, in 1971, of the present day pre-stressed, pre-cast, concrete Railway Sleeper, on which the railway line is laid, used by all the Indian Railways. We worked with the CSIR, Madras and the RDSO, Lucknow, and finalized the design and prototypes in less than 12 months time.
